Professional Summary

Results-oriented Full Stack Engineer with 5 years of experience delivering high-quality software solutions. Deep expertise in the **Python** ecosystem (Django/FastAPI) and modern **React** frontend development. Strong background in cloud-native technologies, specializing in **AWS** serverless architectures and **Kubernetes** orchestration. Adept at agile collaboration and translating complex business requirements into technical implementations.

Core Competencies

Backend: Python 3.9+, Django, Django REST Framework, GraphQL (Graphene), Node.js

Frontend: React 18, Next.js, TypeScript, Tailwind CSS, Redux Saga

Data: PostgreSQL, DynamoDB, Redis, Elasticsearch

Infrastructure: AWS (ECS, Fargate, Lambda, API Gateway), Docker, Kubernetes (Helm), Terraform

Quality: PyTest, Cypress, Selenium, SonarQube

Work Experience

CloudScale Systems

Seattle, WA

Senior Software Engineer

2020–Present

- Architected and built a multi-tenant SaaS platform using **Django** and **React**, serving over 200 enterprise customers.
- Implemented a serverless image processing pipeline using **AWS Lambda** and S3, reducing processing costs by 60% compared to EC2 instances.
- Developed a comprehensive UI component library in React and TypeScript, standardizing the design language across 4 different products.
- Managed the migration of the primary database from MySQL to **PostgreSQL**, including schema optimization and data validation scripts.
- Configured **Jenkins** pipelines for automated building, testing, and blue/green deployments to Kubernetes clusters.
- Mentored junior developers on React hooks patterns and Python performance optimization techniques.

StartUp Nexus

Portland, OR

Software Developer

2018–2020

- Developed full-stack features for a gig-economy marketplace app using Python (Flask) and React Native.
- Integrated Stripe API for payment processing and Twilio for SMS notifications.
- Utilized **Redis** for session management and caching API responses, improving load times by 200ms.
- Wrote unit and integration tests achieving 90% code coverage.
- Participated in daily stand-ups and bi-weekly sprint planning sessions.

Education

University of Washington

B.S. Computer Science

Dean's List 2017, 2018. Capstone Project: Distributed File System in Python.

Seattle, WA

2014–2018

Key Projects

Internal Tool

Kubernetes Auto-Scaler

2023

Built a custom auto-scaling controller for internal workloads.

- Technologies: Python, Kubernetes API, Prometheus.
- Result: Reduced idle resource usage by 25% during off-peak hours.

Freelance

Real-Estate Listing Portal

2021

Full stack development of a property listing site with map integration.

- Technologies: Django GeoDjango, React, Mapbox GL, PostgreSQL (PostGIS).

Certifications

2023: AWS Certified Solutions Architect – Associate

2022: Certified Kubernetes Administrator (CKA)

Languages

English: Native Proficiency

Mandarin: Professional Working Proficiency
