Summary

Highly skilled Senior Full Stack Developer with over 6 years of experience building scalable web applications. Expert proficiency in **Python (Django/Flask)** and **JavaScript (React.js/Redux)**. Proven track record of designing RESTful APIs, optimizing PostgreSQL database schemas, and deploying microservices on **AWS** using **Docker** and **Kubernetes**. Passionate about Test Driven Development (TDD) and automating CI/CD pipelines.

Technical Skills

Languages	Python, JavaScript (ES6+), TypeScript, SQL, HTML5, CSS3
Frontend	React.js, Redux, Hooks, Material-UI, Webpack, Babel
Backend	Django, Django REST Framework, Flask, FastAPI, Celery
Databases	PostgreSQL, Redis, MongoDB
DevOps & Cloud	AWS (EC2, RDS, Lambda, S3), Docker, Kubernetes, Jenkins, GitHub Actions, Terraform
Methodologies	Agile/Scrum, TDD, CI/CD, OOP, Microservices Architecture

Experience

2021–Present **Senior Full Stack Engineer**, *TechFlow Solutions*, San Francisco, CA

- Lead a team of 5 developers in re-architecting a legacy monolithic application into microservices using **Python (Django)** and **React.js**, resulting in a 40% reduction in server response time.
- Designed and implemented scalable database schemas in **PostgreSQL** to handle over 1 million daily active users.
- Developed interactive, responsive frontend dashboards using React, Redux Toolkit, and Recharts for real-time data visualization.
- Orchestrated containerized application deployment using **Docker** and **Kubernetes** on AWS EKS, ensuring 99.9% uptime.
- Implemented a robust CI/CD pipeline using **GitHub Actions** to automate testing (PyTest, Jest) and deployment to staging and production environments.
- Integrated Redis for caching frequently accessed data, reducing database load by 30%.

2018–2021 **Full Stack Developer**, *Orbit Media*, Austin, TX

- Built and maintained RESTful APIs using **Django REST Framework** for a high-traffic e-commerce platform.
- Created dynamic frontend components using React class and functional components, ensuring cross-browser compatibility.
- Collaborated with DevOps to migrate on-premise infrastructure to **AWS (EC2, RDS)**, utilizing CloudFormation for infrastructure as code.
- Championed the adoption of TDD within the team, increasing code coverage from 40% to 85%.
- Optimized SQL queries and added database indexing to improve report generation speed by 50%.

2016–2018 **Junior Python Developer**, *DataSync Corp*, Austin, TX

- Assisted in the development of backend services using Flask and SQLAlchemy.
- Wrote automation scripts in Python to process and clean large datasets.
- Participated in code reviews and bug fixing sprints.
- Gained initial exposure to frontend development using vanilla JavaScript and jQuery.

Education

2012–2016 **Bachelor of Science in Computer Science**, *University of Texas at Austin*, Austin, TX

Focus on Software Engineering and Database Systems. Graduated Cum Laude.

Projects

2022 **FinStream Analytics Platform**, *Proprietary*

Led the full-stack development of a financial analytics tool.

- **Stack:** React, Django, PostgreSQL, AWS Lambda.
- **Outcome:** Enabled real-time stock tracking for 500+ enterprise clients.

2020 **SafeGuard IoT Dashboard**, *Open Source Contribution*

Contributed to a dashboard for monitoring IoT device health.

- **Stack:** React, Redux, WebSocket, Python AsyncIO.
- **Role:** Implemented the live notification system using WebSockets.

Certifications

- AWS Certified Developer – Associate (2022)
- Certified Kubernetes Application Developer (CKAD) (2021)

Interests

Hobbies Open Source contributing, Hiking, Amateur Chess

Community Organizer of local "Python & Pizza" meetup group
