

Java Developer – Job Description

Location: [Company Location / Remote]

Job Type: Full-time / Part-time / Contract

Job Summary

We are looking for a skilled and motivated Java Developer to join our development team. The ideal candidate will be responsible for designing, developing, testing, and maintaining high-performance Java applications. You will work closely with cross-functional teams to build scalable, secure, and reliable software solutions.

Key Responsibilities

- Design, develop, and maintain Java-based applications
- Write clean, scalable, and well-documented code
- Participate in the full software development lifecycle (SDLC)
- Integrate user-facing elements with server-side logic
- Optimize applications for maximum speed and scalability
- Troubleshoot, debug, and upgrade existing systems
- Collaborate with designers, QA engineers, and project managers
- Follow best practices in coding, testing, and deployment

Required Qualifications

- Bachelor's degree in Computer Science, Software Engineering, or related field
- Strong knowledge of Java, OOP concepts, and data structures
- Experience with Spring / Spring Boot / Hibernate
- Familiarity with RESTful APIs and microservices
- Understanding of SQL databases (MySQL, PostgreSQL, etc.)
- Experience with Git or other version control systems
- Basic knowledge of HTML, CSS, and JavaScript is a plus

Preferred Skills

- Experience with Docker, CI/CD pipelines, and cloud platforms
- Knowledge of security best practices
- Familiarity with Agile/Scrum methodology
- Strong problem-solving and communication skills

What We Offer

- Competitive salary and performance bonuses
- Learning and professional growth opportunities
- Friendly and collaborative work environment
- Opportunity to work on real-world, scalable projects
