Professional Summary

Results-oriented Full Stack Developer with 4.5 years of experience building high-performance web applications. Deeply proficient in the **Python** ecosystem and modern JavaScript frameworks (**React.js**). Extensive experience migrating legacy systems to modern architectures and managing cloud infrastructure. Skilled in **Docker** orchestration and agile development methodologies.

Technical Skills

Backend: Python, Django, Flask, FastAPI, REST APIs, GraphQL

Frontend: React.js, Redux Toolkit, Context API, Bootstrap, Material UI

Databases: PostgreSQL, MySQL, MongoDB

Infrastructure: Docker, Docker Compose, Azure (App Service, Blob Storage), Nginx

Methodologies: Agile/Scrum, CI/CD, TDD

Professional Experience

Nexus Innovations

New York, NY

Full Stack Developer

Feb 2021 – Present

- **System Migration:** Successfully led the migration of a monolithic PHP application to a modern microservices architecture using **Python (Django)** and **React**, resulting in a 30% reduction in maintenance costs.
- **API Development:** Designed and documented over 50 RESTful API endpoints using Django REST Framework and Swagger/OpenAPI.
- **Frontend Engineering:** Built dynamic, responsive user interfaces using **React.js**; implemented complex state management using Redux for a logistics tracking dashboard.
- **Containerization:** Dockerized the entire application stack (Frontend, Backend, Database) to ensure consistent environments across development, testing, and production.
- **Cloud Management:** Managed application deployment on Microsoft Azure; while primary experience is Azure, actively cross-training on **AWS** services (EC2, RDS) for personal projects.
- **Performance:** Optimized SQL queries in **PostgreSQL**, reducing reporting load times by over 50%.

StartUp Hype

Chicago, IL

Software Engineer

Aug 2019 – Jan 2021

- Collaborated with a small team to build an MVP for a social booking platform using Python and JavaScript.
- Developed the initial frontend using React.js, creating reusable components to speed up future development.
- Set up automated testing pipelines using PyTest and Selenium.
- Integrated third-party payment gateways (Stripe) and email services (SendGrid).

Tech Corp

Chicago, IL

Junior Web Developer

June 2018 – July 2019

- Assisted senior developers in maintaining internal tools built on Python.
- Fixed bugs and implemented minor features in the frontend codebase.
- Participated in daily stand-ups and sprint planning sessions.

Education

Illinois Institute of Technology

Bachelor of Engineering in Information Technology

Chicago, IL

May 2018

Relevant Projects

React & Django

E-Commerce Platform

- Built a fully functional e-commerce site featuring a shopping cart, user authentication, and payment processing.
- Tech Stack: React, Redux, Django, PostgreSQL, Docker.
- Deployed on AWS EC2 using Nginx and Gunicorn.

WebSocket Tech

Real-Time Chat Application

- Developed a chat application allowing users to create rooms and message in real-time.
- Utilized Python WebSockets and React Hooks.

Languages

English (Native), Spanish (Conversational)
