

Elena Rostova | Senior Backend Engineer

Seattle, WA

☎ (555) 234-5678 • ✉ elena.rostova@email.com • 🌐 github.com/erostova

Professional Summary

Highly skilled Backend Engineer with 6 years of experience specializing in high-load systems using **Python** and **Django**. Expert in database optimization, API design, and cloud infrastructure on **AWS**. Proven ability to build robust, scalable microservices. Currently seeking to expand frontend capabilities while leveraging deep backend expertise.

Technical Skills

Backend: Python (Expert), Django, DRF, SQLAlchemy, AsyncIO

Database: PostgreSQL (Advanced PL/SQL), Redis, Cassandra

Frontend: HTML5, HTMX, Jinja2 Templates, Basic JavaScript/jQuery

DevOps: Docker, Kubernetes, AWS (Lambda, API Gateway), Terraform

Professional Experience

CloudScale Systems

Seattle, WA

Senior Backend Developer

2020 – Present

- Architected a high-throughput transaction processing engine using **Python/Django**, handling 10k+ requests per second.
- Migrated core monolith services to Dockerized microservices orchestrated via Kubernetes on AWS EKS.
- Optimized complex SQL queries in PostgreSQL, reducing average data retrieval latency by 60%.
- Implemented server-side caching strategies using Redis to offload database reads.

DataLogix

Seattle, WA

Python Developer

2017 – 2020

- Developed REST APIs for internal data ingestion tools using Flask and Django.
- Automated ETL pipelines using Python scripts and Cron jobs.
- Collaborated with data scientists to optimize algorithms for production environments.

Education

University of Washington

M.S. Computer Science

2017
